Achieving a Better Life Experience (ABLE) Act

With so many people being diagnosed with a variety of special needs, we want to highlight a federal law that allows you to set aside money to provide for your loved ones without making them ineligible for government programs such as Medicaid or SSI.

This month's puzzle is a little different than what we've featured in the past. In "2048," the

object of the game is to use the arrow keys on your keyboard to connect tiles with the same value in order to double their value. For example, two "2" tiles make a "4," two "4" tiles make an "8," etc. The player continues this pattern until he is able to connect two "1024" tiles to make the elusive "2048" tile, or until the board fills up and it is impossible to match two like tiles together.

Click [here](#) to start playing this deceptively challenging game. Don't get frustrated if it takes you a few tries to understand the movement of the tiles. Even if you don't win and get all the way to the "2048" tile, remember that playing even just ten or fifteen minutes a day can help prevent dementia.

Happy Memorial Day!

As we approach Memorial Day weekend, we want to say "thank you" to all of our clients who have served in the armed forces and for all of their families who sacrificed as well. We appreciate your service!
